

# WORKPLACE VIOLENCE PREVENTION/INTERVENTION TRAINING FOR HEALTHCARE FACILITIES

## Is your Healthcare Facility prepared for a Violent Attack.

As an administrator in healthcare, chances are you've worried about potential violence in one of your facilities. We have all seen the increasing frequency of violent acts against hospitals and clinics. And, sadly, we know that any healthcare facility could be a target.

## The Best Strategy for Preventing Violence in any Healthcare Facility is Protection Through Prevention

We provide the highest form of "evidence-based" security training programs for the healthcare industry to dramatically improve the safety, security and productivity of their employees by advancing their effectiveness in preventing workplace violence.

## Is Your Healthcare Facility OSHA Compliant?

There is an OSHA/ANSI Standard Requirement  
WVPI1-2011 for Workplace Violence  
Prevention/Intervention

**Call Us Today to discuss how our Violence Prevention Training Program can help make your Healthcare Facility and employees safer against a violent attack.**

## Preventing Targeted Workplace Violence through Prevention and Intervention

Security is now part of everybody's job. The cost of violence is high, not only in dollars and lost productivity, but in human terms as well. When staff and employees are involved in preventing violence, it's a win-win situation.

**Step 1** Healthcare Organizations must conduct a complete threat and vulnerability assessment. We work with healthcare organizations to review policies and procedures already in place, identify any changes needed, conduct a gap analysis to make sure each segment of the organization is included, create appropriate documentation and provide written report observations and recommendations.

### Training

**Step 2** Train All Employees-Aggressive behavior, Reporting and Response options

**Step 3** Train All Managers and Supervisors

**Step 4** Train the Threat Assessment Team & Crisis Management Team

**Step 5** Train the Executive Team

By incorporating these five steps, your healthcare organization will have the readiness, response, and recovery components needed to ensure your entire organization is prepared and protected in the event of a violent attack. Training will be conducted by our security expert "Pete Van Beek, MS, CFI, he is a Board Certified in Workplace Violence Prevention/Intervention, Threat Management, Forensic Interviewing, Security Force Management".

# OSHA REQUIRED HEALTHCARE FACILITY SECURITY TRAINING

## What's Included in the Healthcare Violence Prevention/Intervention Training Program

### Critical Components of a Violence Prevention and Intervention Program

- Threat and Vulnerability Evaluation/Assessment
- Establish/Train a Threat Assessment Team
- Understanding the Pathway to Violence
- Tracking System for Aggressive Behaviors
- Training on Updated Policies/Procedures
- Continuation of Operations Plan
- Create Updated Policies/Procedures
- Procedures to Identify Aggressive Behaviors
- Aggressive Behavior Intervention Protocol
- Domestic Violence in the Workplace
- Emergency Response Options

### What Will You Learn in the Healthcare Violence Prevention/Intervention Training?

The Van Beek System's Violence Prevention program trains your administrative staff, nurses, physicians, and other employees and focuses on extreme violence prevention by giving staff and employees the knowledge, skills, and confidence to prevent an attack in the workplace.

- Enhancing awareness of surroundings, others, and ourselves
- Identifying suspicious people and behaviors
- Reporting and responding to incidents
- Intervention and dealing with aggressive behavior from patients, staff and visitors.
- Options for responding if extreme violence occurs

Our evidence-based, violence prevention training programs and procedures are designed to help any hospital, clinic or other healthcare facility of all sizes become prepared to prevent a violent attack. They are effective, they can be implemented in any setting, and they will change the way your staff thinks about, addresses, and responds to violent attacks.
